EXPERIENCE

APPLICATIONS DEVELOPER – ADP – Pasadena, CA 11/2019 – Present

- Reduced deployment times by over 20 hours per deployment by developing an automated, version controlled, zero-downtime CI/CD pipeline for AWS micro-services.
- Deployed and developed 3 business critical, high visibility applications to AWS environment.
- Coordinated with business, management and technology teams to integrate applications and on-board clients onto cloud based file delivery solutions.
- Optimized data visualization of file transmissions by leveraging Splunk dashboards.
- Increased security of AWS components by removing vulnerabilities with scripts and AWS CLI.
- Mentored and on-boarded team members onto projects, AWS, and CI/CD process.

APPLICATIONS DEVELOPER INTERN – PennyMac – Agoura Hills, CA 06/2019 – 11/2019

- Reduced manual burden of loan management process by collaborating with peers to develop and design UI for a loan management system using React, JavaScript, PostgreSQL and GraphQL.

WEB DEVELOPER – California State University Northridge – Northridge, CA 12/2018 – 06/2019

- Increased traffic to CSUN Engineering website by revamping website with modern graphics and refactoring website paths for a seamless web navigation experience.

PROJECTS

MOBILE DEVELOPER & UI/UX DESIGNER – REP | Northridge, CA 08/2018 – 06/2019

- Designed and developed a street food vendor locator iOS/Android React Native mobile app.

UNITY DEVELOPER AND DESIGNER – Run Nacho, Run | Northridge, CA 08/2018 – 06/2019

- Designed and developed a 2D platform runner with the Unity game engine.
